PROFESSIONAL SUMMARY

Java Full Stack Developer with 2+ years of experience delivering production-grade banking and FinTech applications end to end, from Spring Boot microservices and REST APIs to HTML, CSS, and JavaScript user interfaces. Developed and supported 200+ REST APIs, integrated 100+ external services, and built complete customer-facing screens with asynchronous JavaScript (Promises, async/await) across three bank clients. Skilled in Java 17, Spring Boot 3, Spring Data JPA/Hibernate, SQL databases, Resilience4j, and CI/CD with Jenkins and Docker, with full ownership from requirement analysis through SIT, UAT, production release, and support.

TECHNICAL SKILLS

Languages: Java 17, JavaScript (ES6+), SQL, HTML5, CSS3

Backend: Spring Boot 3.3, Spring MVC, Spring Data JPA, Hibernate (JPA), Spring Security (Basic), RESTful APIs, Microservices Architecture, Spring Scheduler, @Async, @ControllerAdvice, Bean Validation, Spring Profiles

Frontend: HTML5, CSS3, JavaScript (ES6+), DOM Manipulation, Asynchronous JavaScript (Promises, async/await), AJAX/Fetch API, setTimeout/setInterval, Client-Side Validation, JSON

Core Java: OOP, SOLID Principles, Collections Framework, Streams API, Lambda Expressions, Generics, Custom Exceptions, Transaction Management (@Transactional)

API Integration & Resilience: Third-Party API Integration, Swagger/OpenAPI, Resilience4j (Circuit Breaker, Timeout, Fallback), API Failure and Downtime Handling

Security: Authentication and Authorization, Hashing, Encryption/Decryption, Public/Private Key Cryptography

Databases: MySQL, PostgreSQL, Microsoft SQL Server, Stored Procedures, Indexing, Joins, Subqueries, Query Optimization

Testing & Code Quality: JUnit, Mockito, QUnit (JavaScript), SonarQube Quality Gates, Coding Standards

DevOps & Deployment: Git, GitLab, Maven, Jenkins (CI/CD), Docker, Kubernetes (Basic), JBoss Application Server, Apache Tomcat

Messaging, Caching & Tools: Apache Kafka (Basic), Redis (Basic), JasperReports, SLF4J, Log4j, Jira

PROFESSIONAL EXPERIENCE

I-Exceed Technology Private Limited

Bengaluru, Karnataka

Java Full Stack Developer

October 2024 – Present

- Developed full-stack banking features for Bandhan Bank, UCO Bank, and Odisha Gramya Bank, building Spring Boot REST APIs and microservices on the backend and HTML, CSS, and JavaScript screens on the frontend.
- Engineered and maintained 200+ RESTful APIs and integrated 100+ external services, including CBS, eKYC/CKYC, payment gateway, authentication, and SMS/OTP APIs.
- Delivered 25+ critical and 48+ medium-complexity modules with full ownership from requirement analysis and development through SIT, UAT, production release, and post-production support.
- Built complete frontend screens and client-side logic in JavaScript (ES6), handling asynchronous API calls with Promises and async/await and time-based UI behavior with setTimeout and setInterval.
- Improved service availability during third-party outages by implementing Resilience4j circuit breakers, timeouts, and controlled fallback responses for external API failures.
- Optimized data access with Spring Data JPA, Hibernate, and SQL across MySQL, PostgreSQL, and SQL Server using indexing, joins, stored procedures, and transaction management.
- Contributed to a Spring Boot version upgrade and the migration of monolithic applications to a microservices architecture, enabling modular services and independent deployments.
- Implemented asynchronous and scheduled processing with @Async and Spring Scheduler, and standardized error handling with @ControllerAdvice, Bean Validation, and SLF4J/Log4j logging.
- Tested backend code with JUnit and Mockito and frontend scripts with QUnit, met SonarQube quality gates, and documented APIs with Swagger/OpenAPI.
- Built and deployed applications through Maven, GitLab, Jenkins CI/CD pipelines, and Docker on JBoss and Apache Tomcat, and developed JasperReports-based report generation.

KEY PROJECTS

Account Opening System (AOS) Bandhan Bank

Tech Stack: Java, Spring Boot, REST APIs, JPA/Hibernate, SQL, JavaScript, HTML, CSS, JBoss, eKYC/CKYC, CBS

- Owned the module end to end, covering requirements, team coordination, development, SIT/UAT, production releases, and client communication.
- Built backend services and frontend screens for tablet-based customer onboarding, integrating government eKYC/CKYC APIs to retrieve and validate customer identity data.
- Developed JavaScript onboarding flows with asynchronous API integration, plus Base64 document capture, CBS de-duplication checks, and saved-application (draft) functionality.
- Developed a multi-level Maker, Branch Checker, and CPU Checker approval workflow culminating in CBS account creation.

Taxation and Payment Gateway Module UCO Bank

Tech Stack: Java, Spring Boot, Microservices, REST APIs, SQL, JavaScript, HTML, CSS, CBS, Payment Gateway

- Developed microservices and customer-facing screens for a tax payment gateway supporting GST, customs duty, TIN, and other government tax payments.
- Implemented the end-to-end transaction flow across tax portals, account services, CBS, and the database, covering payable amount display, account selection, balance validation, CBS fund transfer, status updates, and portal redirection.
- Secured external-service communication using hash-based authentication and public/private-key encryption and decryption.

Retail Banking and Service Request Platform Odisha Gramya Bank

Tech Stack: Java, Spring Boot, Microservices, REST APIs, SQL, JavaScript, HTML, CSS, Apache Tomcat

- Built backend microservices and complete UI screens for retail banking service requests, including AEPS activation/deactivation and customer service workflows.
- Implemented deposit calculators for multiple account types and Internet/Mobile Banking activation flows.
- Strengthened account security with session timeout, password-expiry policies, and SIM binding for registered-device verification.
- Deployed and supported microservices on Apache Tomcat across SIT, UAT, and production releases.

ACHIEVEMENTS

- Received client and management appreciation for ownership, on-time delivery, and resolution of critical production issues on the Bandhan Bank AOS project.
- Entrusted as the primary client-facing point of contact for Bandhan Bank AOS as an early-career engineer, managing delivery timelines and technical communication.

EDUCATION

Bachelor of Engineering, Computer Science and Engineering 2020 – 2024
Don Bosco Institute of Technology, Bengaluru | CGPA: 8.8/10
